WARRANTY

1 Year Limited Warranty

SPECIAL FEATURES

- High Flow Rate**
 Flow rate of 6.7 GPM supports continuous water supply for coffee, espresso, and ice applications in commercial kitchens.
- Quick Change Design**
 Sanitary quick-change filter style supports structured filter replacement in commercial kitchen operations.
- Certified System**
 NSF Certified construction supports commercial kitchen and beverage service filtration applications.
- Multi-Stage Filtration**
 0.2 micron filtration with bacteria, viruses, chlorine, sediment, and taste reduction supports treated water supply for foodservice use.
- Wide Pressure Range**
 Pressure range of 10–125 PSI supports varied commercial water line conditions in foodservice environments.
- Warranty Coverage**
 It includes a 1 year limited warranty by the manufacturer.

PRODUCT OVERVIEW

The ChefPro Series Water Filtration System is designed for commercial kitchens, cafés, coffee stations, and beverage service applications requiring treated water supply. It is constructed using plastic and metal in a black and silver finish. The system measures 34" (L) x 6.75" (W) x 25.69" (H) and is suitable for countertop or inline installation in foodservice environments.

The ChefPro Series Water Filtration System operates at a flow rate of 6.7 GPM with a pressure range of 10–125 PSI for commercial water filtration applications. It supports a temperature range of 35°F to 100°F with a maximum temperature of 100°F. The unit is configured for applications such as coffee, espresso, and ice production systems in commercial kitchen setups.

The ChefPro Series Water Filtration System includes an SR-X Feeder and uses a sanitary quick-change filter style for maintenance handling in foodservice operations. It incorporates a 20" pre-filter with 0.2 micron filtration, designed for bacteria, viruses, chlorine, sediment, and taste reduction in commercial beverage and ice applications.

The ChefPro Series Water Filtration System is NSF Certified and includes a 1 year limited warranty by the manufacturer. It features a 3/4" inlet and 3/4" outlet size for water connection in commercial kitchen plumbing systems. The shipping weight of the unit is 43 lb for handling and installation planning.
