SPECIAL FEATURES

- Clear Product Visibility**
 The right-hinged swing glass door lets customers and staff see chilled contents at a glance, reducing door-open time on a busy service counter.
- Secure Storage Included**
 A keyed lock with locks and keys included at delivery lets operators secure the cabinet during closing hours without sourcing additional hardware.
- Standard Electrical Connection**
 The NEMA 5-15P plug and 1.5-amp draw at 115V/60Hz mean the unit connects to a standard commercial kitchen outlet with no dedicated circuit required.
- Compact Counter-Ready Footprint**
 At 23 3/8" wide and 34 5/8" tall, this unit slides into tight front-of-house or back-of-house spaces where a full-size merchandiser would not fit.
- Flexible Interior Layout**
 Two adjustable heavy-duty epoxy-coated shelves allow operators to reconfigure the 4 cu ft interior around bottles, cans, or packaged foods as menu needs change.
- Dual ETL Certification**
 ETL Listed and ETL Sanitation Listed certifications confirm the refrigerator meets established safety and sanitation requirements recognized across commercial food service operations.

PRODUCT OVERVIEW

The Frigomax Series upright glass door merchandiser refrigerator is a compact, single-section chiller suited for restaurants, cafés, convenience counters, and other commercial kitchen environments where grab-and-go beverage or food display is needed in a tight footprint.

At 23 3/8" (W) x 25 3/4" (D) x 34 5/8" (H), this 4 cubic foot unit fits into narrow service areas without sacrificing usable interior space. Two adjustable heavy-duty epoxy-coated shelves organize product effectively, while the right-hinged swing glass door allows clear visibility of contents from the front counter. A keyed lock with included locks and keys keeps stored items secure during off-hours.

Temperature is maintained at 33°F–41°F via electronic control, keeping food and beverages within safe holding ranges. The unit runs on R-290 refrigerant, drawing 1.5A at 115V/60Hz single-phase through a NEMA 5-15P plug. The 1/6 HP compressor and ventilated chiller design ensure consistent airflow, while interior LED lighting keeps items well-lit and the aluminum alloy frame adds structural stability.

The Frigomax Series merchandiser carries both ETL Listed and ETL Sanitation Listed certifications, confirming it meets recognized safety and sanitation standards for commercial food service use. This unit ships as one piece and is backed by a 1-year warranty.
