SPECIAL FEATURES

- Capacity**
 The 46 cubic foot interior across two sections provides ample cold storage for commercial kitchens managing high volumes of perishable ingredients.
- Electronic Temperature Control**
 An electronic temperature control system maintains the cabinet between 33°F and 41°F, keeping stored food items within safe refrigeration ranges.
- Lockable Door Access**
 Both solid doors are fitted with locks and keys, allowing kitchen managers to control access to stored ingredients in a shared commercial environment.
- Self-Closing Doors**
 Solid swing doors with a self-closing mechanism and 90-degree stay-open feature support smooth, hands-free access during active food handling.
- EC Fan Motor**
 The EC fan motor operates the refrigeration system efficiently, supporting stable airflow and temperature consistency throughout the cabinet interior.
- Certifications**
 The unit is ETL Listed and ETL Sanitation Listed, confirming it meets established safety and sanitation standards for commercial food service use.

PRODUCT OVERVIEW

The Frigomax Series 54" Reach-In Refrigerator is a freestanding, two-door refrigeration unit designed for commercial kitchen environments including restaurants, cafeterias, and food service operations that require reliable cold storage across high-demand service periods.

This unit offers 46 cu. ft. of storage across two sections, each with self-closing solid swing doors featuring a 90° stay-open function for hands-free access. Six epoxy-coated shelves organize ingredients, while electronic temperature control maintains 33°F–41°F for safe perishable storage. The top-mounted compressor frees up interior floor space and simplifies routine service access.

Built from stainless steel in a silver finish, the cabinet measures 32 1/16" (L) x 54 1/8" (W) x 82 1/16" (H), offering a substantial footprint suitable for back-of-house placement. Four casters with brakes allow the unit to be repositioned on the kitchen floor and locked securely in place once stationed. The left/right hinge configuration on each door provides layout flexibility when fitting the unit into different kitchen configurations.

Electrical operation runs at 115V, 60Hz, single phase, drawing 2.1 amperes, and the unit connects via a standard NEMA 5-15P plug. The EC fan motor contributes to efficient operation of the refrigeration system. A keyed locking mechanism is included on both doors, adding a layer of access control for stored ingredients. The unit is ETL Listed and ETL Sanitation Listed, confirming it meets recognized standards for commercial food service equipment safety and sanitation.
