WARRANTY

1 Year Limited Warranty

SPECIAL FEATURES

- **115V Operation**
  Operates at 115 V to match standard freezer electrical systems in commercial kitchens.
- **Heating Element Protector**
  Listed as a protector for heating element applications inside freezer equipment.
- **Single Unit Supply**
  Provided as one unit for maintenance or replacement tasks.
- **15A Rating**
  15 A current rating defines the electrical capacity for heating element circuits.
- **Freezer Usage**
  Specified for freezers used in restaurant and food storage environments.
- **Limited Warranty**
  Includes a 1-year limited warranty by the manufacturer as stated.

PRODUCT OVERVIEW

The Medal Equipment protector for heating element is designed for freezers used in commercial kitchen environments such as restaurants, cold storage rooms, and foodservice operations. Classified as a protector for heating element, it functions as an electrical protection component within freezer systems. The part supports maintenance and replacement of compatible equipment.

This unit operates at 115 V, matching common commercial kitchen electrical configurations used in refrigeration and freezer equipment. The specified voltage provides a clear reference for installation and service. It is rated at 15 A, defining the current capacity for electrical connection within designated systems.

The type is listed specifically as a protector for heating element, identifying its role in supporting heating element circuits inside freezers. The usage is defined for freezers, aligning with cold storage applications in food handling environments. These specifications assist technicians when selecting compatible replacement parts.

Manufactured by Medal Equipment, this component is supplied as a single unit for direct installation or servicing. It is intended for use in freezer equipment operating in commercial kitchens. It includes a 1-year limited warranty by the manufacturer, providing stated coverage for the defined period.
