PRODUCT OVERVIEW

The PolarBox Series Walk-In Cooler Box is a heavy-duty refrigeration unit ideal for commercial cold storage environments. Made in America with white galvanized steel of 24-gauge thickness, it provides strength and corrosion resistance. The 4-inch polyurethane insulation with R-28 thermal resistance delivers efficient temperature retention, while the floor adds a stable and easy-to-clean surface.

Designed with a solid swing door featuring a keyed lock and a self-closing, flush-mounted structure, it enhances security and minimizes air loss. The modular cam-lock and tongue & groove panel design provide tight sealing, reducing gaps for consistent performance. Measuring 6 ft (W) x 8 ft (D) x 7 ft (H), it offers ample storage capacity with a door height of 77 inches for easy accessibility.

This hardwired commercial walk-in cooler box includes CFC and HFC-free insulation materials for an environmentally safe build. It is UL Listed US, NSF Listed, and DOE certified for quality and compliance. It is backed by a 10-year panel warranty and 1-year parts warranty on doors.
