PRODUCT OVERVIEW

The ProKitchen Series Drawer Warmer is a freestanding commercial kitchen holding unit designed for restaurants, catering units, and food service operations that require controlled hot holding of prepared food. The unit is constructed with heavy-duty stainless steel for consistent use in commercial kitchen environments.

This drawer warmer operates on 120 V, single phase power with a wattage of 500 W and frequency of 60 Hz. It is fitted with a NEMA 5-15P plug type for electrical connection. The unit includes manual temperature control with a temperature range of 85°F to 185°F, supporting hot holding applications in food service operations.

The equipment features a single drawer design with smooth drawer operation and integrated slides. It includes a large comfortable handle for handling in busy commercial kitchen workflows. The unit comes with adjustable sliding vent for humidity control and indicator lights for operational status monitoring.

Built with stainless steel construction, the drawer warmer measures 29.13" (L) x 23.5" (W) x 14" (H). It is installed as a freestanding unit with four adjustable 4-inch legs. The product weight is 77 lb, while shipping weight is 95 lb. It includes a 12" x 20" x 6" stainless steel pan and comes with a 1-year parts & labor warranty. It is CSA Sanitation Listed.
