Cutting thickness is adjustable from 2 mm to 20 mm for different vegetable and fruit preparation requirements.
- ✓ **Dual Variable Speed**
The dual variable speed adjustable system supports processing different ingredients and textures.
- ✓ **Warranty Included**
It includes a 1-year warranty by the manufacturer for commercial foodservice use.

PRODUCT OVERVIEW

The ChefPro Series Vegetable Chopper is an electric food preparation machine designed for commercial kitchens, restaurants, catering operations, and food processing tasks. It is suitable for vegetables and fruits including onions, potatoes, carrots, cucumbers, and similar ingredients. The unit supports sliced, shredded, diced, and chopped cutting styles for different food preparation requirements.

The vegetable chopper features stainless steel construction with a silver finish. It measures 13.9" (L) x 13" (W) x 17.3" (H) and weighs 33 lb. The compact design is suitable for countertop food preparation areas in commercial kitchens and foodservice operations.

This electric vegetable cutter operates on 110 V power with a 200 W motor and a rotational speed of 1400 RPM. The dual variable speed adjustable system supports different ingredient processing requirements. Adjustable cutting thickness ranges from 2 mm to 20 mm for varied slicing and preparation applications.

The unit features a curved blade made from 420 stainless steel. Upgraded removable conveyor belts and blades support maintenance and component replacement procedures. Included accessories are 1 blade wrench, 1 hex wrench, 1 lubricating oil, and 2 conveyor belt sets. The machine has a production output of up to 450 lbs per hour and includes a 1-year warranty by the manufacturer.
