Ensures strong and consistent performance for heavy-duty tasks.

✓ **Heavy-Duty Floor Design**
Built for stability and continuous commercial use.

✓ **1-Year Warranty**
Offers reliable parts and labor coverage.

PRODUCT OVERVIEW

The KitchenCore Series planetary mixer is built for powerful, high-capacity mixing in demanding commercial environments. Manufactured in China, this heavy-duty floor model is ideal for bakeries, restaurants, cafés, and large-scale kitchens that require consistent performance for bulk food preparation. Its robust construction ensures durability and reliability during continuous operations.

Constructed with a solid metal body and a stainless steel mixing bowl, this mixer is designed for long-lasting use and easy cleaning. Powered by a high-performance 4 HP motor with a gear-driven transmission, it delivers strong torque for handling dense doughs and heavy mixtures. With a large 60 qt bowl capacity, it is perfect for high-volume mixing tasks in busy commercial kitchens.

The mixer features four manual speeds with a range of 91–282 RPM, providing flexibility for various mixing applications. Its push-button control system allows for simple operation, while the manual-style lift ensures smooth and stable bowl positioning. Designed for 240V three-phase power, it supports efficient and reliable performance in professional setups.

Safety and efficiency are enhanced with built-in features such as an emergency stop, bowl guard, safety cut-switch, and surge protector. It comes with essential 304 stainless steel attachments including a flat beater, dough hook, wire whisk, and wire guard. Certified with ETL sanitation standards and backed by a 1-year parts and labor warranty, this mixer delivers dependable performance for high-demand kitchens.
