1 Year Warranty

SPECIAL FEATURES

- Clear Product Visibility**
 The single glass door lets staff and customers view frozen items at a glance without opening the cabinet, reducing cold air loss during busy service periods.
- Secure Storage**
 The integrated key lock keeps frozen inventory secured when the unit is in an unsupervised area of a restaurant or retail space.
- Certified for Food Service**
 ETL Listed and ETL Sanitation Listed certifications confirm the freezer meets established safety and sanitation requirements for use in commercial food-handling environments.
- Flexible Interior Layout**
 Two adjustable shelves allow the 4 cu ft interior to be reconfigured to fit different package heights and frozen food formats as menu needs change.
- Low Power Draw**
 Running at 2.3 amperes on a standard 115V, 60 Hz single-phase circuit with a NEMA 5-15P plug, the unit connects to a common commercial kitchen outlet without requiring dedicated wiring.
- Covered After Purchase**
 Each unit comes with a 1-year warranty, providing a defined period of coverage from the date of purchase for a commercial kitchen operator.

PRODUCT OVERVIEW

The Frigomax Upright Ventilated Freezer-Glass Door Series offers a compact single-door merchandising freezer designed for commercial kitchens, convenience stores, cafes, and restaurants that need front-facing frozen product display in a tight footprint.

With a 4 cubic foot interior and 2 adjustable shelves, the unit holds a practical quantity of frozen goods between restocks while keeping the cabinet organized for different product sizes. The glass door with left-side hinge provides clear visibility of stored items without opening the door, helping staff and customers locate products quickly. A key lock secures the contents when the unit is unattended.

The freezer maintains a temperature range of -8°F to 0°F, suitable for holding frozen foods in a commercial food-handling environment. Electronic controls allow straightforward temperature adjustment, and R-290 refrigerant is used in the 1/5 HP refrigeration system. LED lighting inside the cabinet keeps frozen items visible without adding significant heat load. The unit draws 2.3 amperes at 115V, 60 Hz on a single-phase circuit and ships with a NEMA 5-15P plug for standard outlet compatibility.

The cabinet is constructed from coated steel and measures 25 3/4" (L) x 23 3/8" (W) x 34 5/8" (H), making it a space-efficient option for counter-adjacent or floor placement. ETL Listed and ETL Sanitation Listed certifications confirm the unit meets recognized safety and sanitation standards for commercial food service use. A 1-year warranty is included with each unit.
