**WARRANTY**

1 Year Limited Warranty

### SPECIAL FEATURES

- ✓ **Daily Production**  
Produces 220 lb of ice in 24 hours to support restaurant beverage service and commercial kitchen demand.
- ✓ **Air Cooling**  
Air-cooled condenser manages heat exchange during continuous ice-making cycles in kitchen environments.
- ✓ **Sanitation Rated**  
NSF Certified construction aligns with hygiene standards commonly required in commercial kitchen operations.
- ✓ **Integrated Storage**  
Built-in bin holds 220 lb of ice for immediate access during food handling and drink preparation.
- ✓ **Push Dispensing**  
Push button dispenser style releases ice directly into containers for controlled portions at service stations.
- ✓ **Warranty Coverage**  
Includes a 1-year limited warranty by the manufacturer for specified parts and service support.

## PRODUCT OVERVIEW

The Platinum Frost Series ice maker is designed for restaurants, cafés, and commercial kitchen beverage stations that require steady on-site ice production with integrated storage. The stainless steel exterior in a silver finish supports routine cleaning and repeated food handling use. A stainless steel evaporator forms the ice surface for consistent freezing. The freestanding installation type allows placement beside counters, or service lines without built-in cabinetry requirements.

This unit produces up to 220 lb of ice within a 24-hour period, supporting beverage service, prep stations, and self-serve applications in busy commercial environments. The internal bin storage capacity also holds 220 lb, allowing produced ice to remain contained for immediate access. The air-cooled condenser manages heat exchange during operation, while the system runs on 115 V power with a 60 Hz electrical rating compatible with standard commercial outlets.

Ice dispensing uses a push button style that releases ice directly into cups or containers, supporting controlled portions and organized food handling. This configuration supports steady workflow at drink counters and service areas. Cabinet dimensions measure 30" (L) x 30.6" (W) x 53.5" (H), providing a vertical profile that combines production and storage in one footprint, suitable for back-of-house or front counter placement within commercial kitchen layouts.

The unit carries NSF Certified status to align with sanitation and hygiene standards used in restaurants and catering spaces. The stainless steel body and internal surfaces support regular cleaning schedules and daily operation. Classified as a freestanding ice maker within the Platinum Frost Series, it fits coordinated equipment setups. It includes a 1-year limited warranty by the manufacturer for specified parts and workmanship coverage.
