It includes a leveling foot for improved stability on uneven flooring.
- ✓ **Extended Height Design**
The post measures 74 in (H), suitable for taller shelving configurations.
- ✓ **Chrome Plated Finish**
It features a chrome plated steel surface for structured shelving installation.
- ✓ **NSF Listed Standard**
It is NSF Listed for sanitation compliance in storage environments.

PRODUCT OVERVIEW

The ProKitchen Series Wire Shelf Post is a commercial kitchen shelving support component designed for structured storage systems used in restaurants, hotels, and food service environments. It is constructed with steel material in a silver finish with chrome plated coating, supporting vertical assembly in wire shelving configurations.

The post measures 74 in (H) and functions as a vertical support element for shelving systems used in dry storage environments. It forms the structural framework required for organizing wire shelving layouts in commercial storage setups.

It is suitable for dry environments used in commercial kitchen storage and general storage systems where shelving support is required for organized storage arrangements.

The unit includes a leveling foot for stability on uneven surfaces. It is NSF Listed, supplied as 1/Each, and includes a 1-year warranty for commercial shelving applications.
