- Stainless Construction**
 304 stainless steel construction supports durability in commercial beverage preparation areas.
- Certified Equipment**
 cETLus Listed for commercial beverage equipment compliance. It includes a 1-year parts and labor warranty by the manufacturer.

PRODUCT OVERVIEW

The ProKitchen Series Coffee Maker is designed for commercial kitchens, cafés, and food service operations requiring controlled high-volume coffee brewing. It features stainless steel 304 construction with a silver finish and an automatic operation type supported by a digital display. The unit supports a single shuttle configuration. Its dimensions are 22.8" (L) x 10" (W) x 34.4" (H).

This ProKitchen Series coffee maker operates with dual voltage support ranging from 120 V to 208–240 V and 50–66 Hz compatibility. It uses an electric power system with a wattage range of 1700–4050 W and includes a hardwired connection. The unit supports a 3/4-inch water inlet size for direct water line connection in commercial beverage preparation setups.

The coffee brewing system supports a brewing capacity of up to 11.3 gallons of coffee per hour, suitable for restaurants and commercial beverage stations. It includes full batch and half batch brewing options along with pre-infusion and pulse brew functions. The system is equipped with three programmable brew profile buttons and a built-in brew counter for operational tracking.

The ProKitchen coffee maker includes stainless steel construction with 304-grade material and is built for commercial beverage environments. It weighs 40.57 lb with a shipping weight of 44.53 lb and includes cETLus certification for commercial compliance. The unit includes a 1-year parts and labor warranty for commercial kitchen operations.
