1 Year Warranty

SPECIAL FEATURES

- ✓ Generous Frozen Capacity**
 The 35.7 cu ft interior across two sections holds a full range of frozen items, reducing how often staff need to restock during a shift.
- ✓ No Manual Defrosting**
 Frost-free automatic defrost keeps the interior clear of ice buildup without requiring staff intervention, supporting consistent daily operation.
- ✓ Certified for Commercial Use**
 ETL Listed, ETL Sanitation Listed, and DOE Compliant certifications confirm the unit meets the safety and energy standards required in commercial kitchen and foodservice environments.
- ✓ Stable Sub-Zero Temps**
 A tested operating range of -0.4°F to -8°F keeps frozen goods at the correct holding temperature throughout a full service day.
- ✓ Standard Electrical Connection**
 At 110V/60Hz and 12 amperes, this freezer plugs into a standard commercial kitchen circuit, avoiding the cost of dedicated electrical work.
- ✓ Covered After Purchase**
 A 1-year warranty is included with each unit, providing a defined service period following installation in a restaurant or commercial kitchen setting.

PRODUCT OVERVIEW

The Frigomax Series 2-door glass door merchandising freezer is designed for restaurants, convenience stores, and commercial kitchen operations that need reliable frozen product display in a high-traffic setting. At 49.6" wide and 79.1" tall, this vertical display freezer occupies a manageable footprint while delivering 35.7 cubic feet of usable frozen storage across two independent sections.

The unit operates within a temperature range of -0.4°F to -8°F, making it suited for storing ice cream, frozen entrees, and other frozen goods that require consistent sub-zero temperatures. Frost-free automatic defrost eliminates manual defrosting cycles, keeping staff focused on service rather than maintenance. The R290 refrigerant is a low global-warming-potential option increasingly required in commercial kitchen environments.

Both swing-style glass doors are self-closing and hinged left and right respectively, helping maintain interior temperature stability during busy service periods. Interior LED lighting keeps stored items clearly visible to staff and customers alike, while adjustable shelving allows the cabinet interior to be reconfigured for items of varying height. The bottom-mounted compressor keeps the cooling components accessible and out of the display zone.

Running on 110V/60Hz and drawing 12 amperes at 1,200 watts, this freestanding unit connects to a standard commercial kitchen electrical circuit without dedicated wiring. The freezer carries ETL Listed, ETL Sanitation Listed, and DOE Compliant certifications, and is backed by a 1-year warranty.
