1 Year Warranty

SPECIAL FEATURES

- Open-Access Display**
 The open display format allows customers and kitchen staff to retrieve chilled items without opening a door, speeding up service flow during peak hours.
- Automatic Defrost**
 Automatic defrost cycles eliminate the need for manual defrost routines, reducing daily maintenance tasks for commercial kitchen or retail staff.
- Certified for Commercial Use**
 ETL Listed, ETL Sanitation Listed, and DOE 2017 Compliant certifications confirm the unit meets established safety, sanitation, and energy standards for commercial environments.
- Efficient Fan Cooling**
 Fan cooling distributes cold air evenly across all 15.0 cubic feet of cabinet space, helping maintain consistent temperatures throughout the unit.
- Low-GWP Refrigerant**
 R-290 refrigerant carries a low global warming potential, making this merchandiser a compliant choice for operations monitoring environmental impact.
- Covered by Warranty**
 A 1-year warranty accompanies each unit, providing a defined period of coverage for restaurant and foodservice operators after purchase.

PRODUCT OVERVIEW

The Frigomax Series Vertical Air Curtain Merchandiser is an open display refrigeration unit designed for restaurants, cafes, convenience stores, and commercial kitchens that need high-visibility cold storage for beverages, grab-and-go items, or fresh foods.

This freestanding unit offers 15.0 cubic feet of refrigerated capacity within a footprint of 33.1" (L) x 50.8" (W) x 57.5" (H), making it a practical choice for floor-level placement in retail or service areas. The open display format removes the need for door handles or pulls, allowing customers and staff to access chilled items quickly.

Fan cooling circulates cold air evenly throughout the cabinet, maintaining a temperature range of 30.2 to 44.6 degrees Fahrenheit (or 33.8 to 50 degrees Fahrenheit in alternate range mode), suitable for a variety of perishable products. Automatic defrost keeps the interior clear of frost buildup without manual intervention, reducing labor demands during busy service periods.

The unit runs on 110V at 60 Hz, drawing 14.6 amperes and consuming 630 watts. R-290 refrigerant, a low global warming potential option, is used in the refrigeration system. LED lighting illuminates the display interior for clear product visibility. Leg levelers allow stable placement on uneven floor surfaces. This merchandiser carries ETL Listed, ETL Sanitation Listed, and DOE 2017 Compliant certifications, and is backed by a 1-year warranty.
