1 Year Warranty

SPECIAL FEATURES

- Wide Display Footprint**
 At 101.6 inches wide, this case spans a full counter run, allowing a bakery or cafe to present a broad selection of items without using multiple separate units.
- Clear Shelf Visibility**
 Glass shelving throughout the interior allows LED light to reach every tier, so displayed baked goods and chilled items remain visually accessible to customers and staff from any angle.
- Recognized Safety Certifications**
 ETL Listed, ETL Sanitation Listed, and DOE 2017 Compliant certifications confirm the unit meets established electrical safety, sanitation, and energy standards for commercial foodservice environments.
- Generous Interior Capacity**
 The 31.1 cubic foot cabinet accommodates large restocking quantities, reducing the frequency of mid-service replenishment in a busy commercial kitchen.
- Low-GWP Refrigerant**
 The R-290 refrigerant carries a low global warming potential rating, making this unit a more environmentally considerate choice for commercial kitchen operations.
- Simple Plug-In Setup**
 The plug-in installation type allows the case to be placed and operational with a standard 110-volt, 60-hertz outlet, without the need for dedicated or hardwired electrical installation.

PRODUCT OVERVIEW

The Frigomax Series refrigerated and dry bakery display case is designed for restaurants, cafes, patisseries, and commercial kitchens that need a full-width, front-facing presentation unit for baked goods and chilled items. With a straight glass front and stainless steel construction, this freestanding case gives staff and guests a clear, unobstructed view of displayed items.

The cabinet holds 31.1 cubic feet of usable space across its 101.6" width, 33.5" depth, and 48.4" height, making it well suited for high-volume service counters where a wide product spread is needed between restocks. Glass shelving keeps the interior bright and allows light to pass through each tier evenly.

Integrated LED lighting illuminates the interior without generating excess heat, supporting the unit's temperature range of 32 to 41 degrees Fahrenheit for perishable bakery items. The R-290 refrigerant is a low global warming potential option, and the unit runs at 110 volts, 60 hertz, drawing 8.11 amperes at 700 watts.

This plug-in installation type means no specialized electrical work is required beyond a standard commercial kitchen outlet. The case carries ETL Listed, ETL Sanitation Listed, and DOE 2017 Compliant certifications, and comes backed by a 1-year warranty.
