SPECIAL FEATURES

- ✓ **Maintains Food Quality**
Provides steady, even heat to keep food warm without drying it out.
- ✓ **Built for Heavy Use**
316 marine-grade stainless steel construction resists corrosion and daily wear.
- ✓ **Energy Efficient**
Insulation reduces heat loss for better temperature control.
- ✓ **Improves Workflow**
Auto-fill and manifold drain minimize manual refilling and draining.
- ✓ **Flexible Holding**
Two independent wells let you hold different foods at separate temperatures.
- ✓ **Easy Monitoring**
Indicator lights give quick visual confirmation of heating status.

PRODUCT OVERVIEW

The ChefPro Series 28-1/4" Modular Drop-In Two-Compartment Hot Food Well is built to deliver dependable hot food holding in high-demand commercial kitchens. With its compact drop-in design, it integrates smoothly into countertops or serving lines without taking up extra space.

Each of the two 12" x 20" wells features independent infinite controls, allowing operators to hold different foods at ideal serving temperatures. The fully insulated, 316 marine-grade stainless steel wells ensure steady heat retention while withstanding continuous, heavy-duty use.

To simplify operation, the unit includes an auto-fill system and a 1" copper manifold drain, reducing manual labor and improving workflow. A drip-free flange, positioning clips, and indicator lights further support clean, efficient, and consistent daily performance.
