1 Year Warranty

### SPECIAL FEATURES

- ✓ Fits Tight Spaces**  
 At 19 5/8" wide and 23 1/2" deep, this freestanding unit fits into narrow counter runs or corners without requiring structural modifications.
- ✓ Flexible Shelf Layout**  
 Four adjustable heavy-duty epoxy coated shelves across 6.4 cubic feet allow staff to reconfigure the interior quickly to accommodate different bottle heights or product arrangements.
- ✓ Certified for Commercial Use**  
 ETL Listed and ETL Sanitation Listed certifications confirm the unit meets recognized electrical safety and food-contact sanitation standards required in commercial kitchen environments.
- ✓ Safe Holding Temperatures**  
 Electronic temperature control maintains the cabinet between 33°F and 41°F, keeping refrigerated beverages and food items within commercially accepted cold-holding ranges.
- ✓ Standard Outlet Ready**  
 The NEMA 5-15P plug and 115V/60Hz single-phase, 2.2-ampere draw mean no dedicated electrical circuit or special wiring is needed for installation.
- ✓ Reduced Maintenance Demand**  
 Automatic defrost cycles eliminate the need for staff to manually defrost the unit, keeping the merchandiser operational with less day-to-day intervention.

## PRODUCT OVERVIEW

The Frigomax Series single glass door merchandiser refrigerator is designed for restaurants, cafes, convenience counters, and other commercial kitchen environments where front-of-house beverage and food display is a daily priority. Its swing glass door and compact 19 5/8" width make it a practical fit for operations with limited floor space.

This unit holds 6.4 cubic feet of storage across four adjustable heavy-duty epoxy coated shelves, allowing staff to organize product by type or size and restock efficiently during service. The electronic temperature control maintains an interior range of 33°F to 41°F, keeping refrigerated items within safe holding temperatures. Automatic defrost eliminates the need for manual defrost cycles, reducing routine maintenance demands.

The merchandiser measures 23 1/2" (L) x 19 5/8" (W) x 60 1/4" (H) and is freestanding, requiring no dedicated installation work. It operates on a standard 115V/60Hz single-phase circuit drawing 2.2 amperes and uses a NEMA 5-15P plug for direct connection to a standard commercial outlet. The 1/5 horsepower compressor supports consistent refrigeration performance across a typical commercial kitchen shift.

Interior LED lighting illuminates displayed items clearly for customer-facing settings. The exterior is constructed from coated steel, and the right-hinged swing glass door provides straightforward access during service. The unit is ETL Listed and ETL Sanitation Listed, meeting recognized commercial food safety and electrical standards. It carries a 1-Year Warranty.
