Remote Refrigeration
Unit**

SPECIAL FEATURES

- Galvanized Steel Body**
 White galvanized steel construction supports commercial kitchen refrigeration environments with daily usage.
- Polyurethane Insulation**
 4-inch insulation with R-28 thermal resistance supports temperature retention inside the walk-in cooler.
- Included Cooling Equipment**
 The unit includes a condensing unit and evaporator for commercial refrigeration setup.
- Controlled Door Access**
 Solid swing door with keyed lock supports restricted entry in food storage environments.
- Commercial Certifications**
 UL Listed US, NSF Listed, and DOE certifications align with commercial kitchen standards.
- Extended Storage Layout**
 Nominal dimensions of 8 ft x 30 ft provide long-format refrigerated storage for food handling operations.
- Remote Refrigeration Design**
 Remote refrigeration system separates cooling equipment from the storage chamber.
- Valve Control System**
 Thermostatic expansion valve and liquid line solenoid valve are included in the refrigeration system.
- Self-Closing Door**
 Flush-mounted self-closing door design supports repeated access in restaurant operations.
- Warranty Coverage**
 Includes a 10-year panel warranty and 1-year warranty on doors and remote refrigeration components.

PRODUCT OVERVIEW

The PolarBox Series Walk-In Cooler is designed for commercial kitchen operations, restaurants, and refrigerated food storage applications. It features white galvanized steel construction suited for daily foodservice environments. The unit measures 98" (L) x 354" (W) x 87" (H), with a nominal size of 8 ft width, 30 ft depth, and 7 ft height for structured cold storage in commercial kitchens.

This walk-in cooler includes 4-inch polyurethane insulation with an R-28 thermal resistance rating to support refrigerated storage conditions. The insulation material is CFC and HFC free and paired with 24-gauge panel construction. The modular cam-lock and tongue-and-groove design supports panel assembly in commercial refrigeration installations.

The refrigeration system uses a remote refrigeration configuration with included condensing unit and evaporator. It incorporates a thermostatic expansion valve and liquid line solenoid valve (TXV/TEV) for refrigeration control. The system operates on 208/230 V, 60 Hz, and single-phase electrical service with a hardwired connection for commercial kitchen setups.

This model includes a solid swing door with a 77-inch height, self-closing operation, and flush-mounted design. A keyed lock supports controlled access in food storage areas. The unit is designed without a floor and supports indoor and outdoor installation. It includes UL Listed US, NSF Listed, and DOE certifications along with a 10-year panel warranty and 1-year warranty on doors and remote refrigeration components.
