It is suitable for dry environments used in commercial kitchen storage areas.
- ✓ **Stable Installation**
It includes a leveling foot for balance on uneven flooring surfaces.
- ✓ **Warranty Coverage**
It includes a 1-year warranty provided by the manufacturer.

PRODUCT OVERVIEW

The ProKitchen Series Wire Shelf Post is a commercial kitchen shelving support component designed for structured storage systems used in restaurants, hotels, and food service environments. It is constructed with steel material in a silver finish with chrome plated coating, supporting vertical structural assembly in wire shelving setups.

The post measures 64 in (H) and is used as a support element in commercial shelving systems installed in dry storage environments. It forms the vertical framework for wire shelves in organized storage configurations.

It is suitable for dry environments used in commercial kitchen storage areas and general storage setups where shelving structure support is required.

The unit includes a leveling foot for stability on uneven surfaces. It is NSF Listed, supplied as 1/Each, and includes a 1-year warranty for commercial shelving applications.
