SPECIAL FEATURES

- Generous Display Capacity**
 The 26 cu ft interior across two sections holds a full range of chilled beverages and food items, reducing how often staff need to restock during peak service.
- Consistent Safe Temperatures**
 Electronic temperature control maintains 33°F to 41°F throughout service, keeping chilled foods within the standard safe holding range for a commercial kitchen.
- Certified for Food Service**
 ETL Listed and ETL Sanitation Listed certifications confirm the unit meets recognized safety and sanitation requirements for commercial food handling environments.
- Flexible Shelf Configuration**
 Eight adjustable heavy-duty epoxy coated shelves let kitchen and floor staff rearrange the interior quickly to fit containers of different sizes without tools.
- Standard Outlet Compatible**
 The 115V, 6-amp, NEMA 5-15P plug connects to existing commercial kitchen circuits without the need for dedicated wiring or an electrician visit.
- Included Security Hardware**
 Locks and keys ship with every unit, giving restaurant operators immediate control over product access on the service floor without a separate purchase.

PRODUCT OVERVIEW

The Frigomax Series 2-door glass merchandiser refrigerator is designed for restaurants, cafes, delis, and retail food operations that need reliable beverage and food display at commercial scale. With a freestanding installation and dual swing glass doors — hinged left and right — the unit fits naturally into front-of-house and back-of-house service lines alike.

At 26 cubic feet of storage across two sections, this unit accommodates a high volume of product between restocks. Eight adjustable heavy-duty epoxy coated shelves allow staff to configure the interior around containers of varying heights, from tall bottles to meal-prep trays. The cabinet measures 29 3/8" (D) x 39 3/8" (W) x 77 5/8" (H), offering a compact footprint relative to its storage capacity.

Electronic temperature control holds the interior between 33°F and 41°F — the standard safe range for chilled food and beverage in a commercial kitchen. Auto defrost eliminates the need for manual defrost cycles, keeping the unit ready for continuous service. LED interior lighting keeps displayed items visible without adding excessive heat load.

Operating on 115V/60Hz single-phase power at 6 amps with a NEMA 5-15P plug, the unit connects to standard commercial kitchen outlets without special wiring. Locks and keys are included with each unit, supporting food safety protocols on the floor. The Frigomax Series carries ETL Listed and ETL Sanitation Listed certifications, confirming compliance with recognized commercial food service safety standards. A 1-year warranty is included with purchase.
