- ✓ **Easy Cleanup**
Detachable drip tray, single lid, and simple assembly make cleaning fast and efficient.
- ✓ **Visual Appeal**
Integrated 4-color LED lighting enhances beverage presentation and customer engagement.

PRODUCT OVERVIEW

The ChefPro Series CP15LSM 15L Slushy Machine is a commercial slushy machine designed for restaurants, cafes, and foodservice operations requiring reliable cold beverage service. Constructed with a stainless steel and ABS plastic body and a polycarbonate bowl, this single bowl slushy machine combines durability with easy handling. Overall dimensions are 18.7" (W) x 11" (D) x 32.1" (H), making it ideal for counter-top placement.

This unit operates at 500 W and features a dual screw auger slushy machine mechanism for 360° mixing, ensuring consistent texture throughout each batch. Digital/electronic controls with a temperature control knob allow settings between 55°F and 77°F. The machine includes one tap, one lid, and a detachable drip tray for convenient service and cleanup.

Reliable Commercial Slushy Machine

This **slushy machine** serves over 42 cups per cycle and includes three preset programs for different beverages, including cold brew coffee, teas, and fresh juices. A 4-color LED light provides visual appeal, while the air-cooled compressor ensures reliable cold operation. The unit comes with a 1-year limited warranty and weighs 59 lb.
