WARRANTY

Parts & Labor: 2 Years
Compressor: 6 Year

SPECIAL FEATURES

- ✓ **High Ice Output**
Produces up to 1000 lb of cube ice per 24 hours for restaurants and beverage service areas.

✓ **Digital Controls**
LED digital display with self-check, auto clean, countdown, and status indication supports monitoring.

✓ **Easy Maintenance**
Removable front dust filter supports routine cleaning access in commercial kitchen settings.
- ✓ **Fast Production Cycle**
Each batch completes in 15 to 17 minutes to support continuous commercial demand.

✓ **Air-Cooled System**
Air-cooled condenser with ventilated airflow supports heat dissipation during operation.

✓ **Certified & Covered**
Energy Star, ETL Sanitation, cETLus, and NSF listings reflect compliance, and it includes a 2-year warranty by the manufacturer with a 6-year compressor warranty.

PRODUCT OVERVIEW

The Platinum Frost Series Air Cooled Ice Machine without Bin is designed for restaurants, cafés, bars, and commercial kitchen operations requiring high-volume cube ice production. The unit measures 30" (L) x 23.4" (W) x 29" (H) and operates as a freestanding air-cooled system. Stainless steel construction supports routine cleaning, while the polyethylene interior supports food-contact handling.

This machine produces up to 1000 lb of cube ice within 24 hours, with a production time of 15 to 17 minutes per batch. Adjustable ice thickness supports varied beverage and foodservice applications. The air-cooled condenser and ventilated airflow layout support heat dissipation in back-of-house commercial environments during continuous operation.

The digital control system features an LED digital display with functions including self-check, auto clean, thickness adjustment, count down, and status indication. Built-in diagnostic sensors support operational monitoring. A removable front dust filter supports routine maintenance access, and the unit holds ice for up to 24 hours during a power interruption.

The unit operates on 220 V, 60 Hz, single-phase power with a 2150 W rating and uses a NEMA 6-20P plug for connection. R-290 refrigerant supports the refrigeration system. Energy Star, ETL Sanitation, cETLus, and NSF certifications reflect compliance with commercial kitchen standards. It includes a 2-year warranty by the manufacturer and a 6-year compressor warranty.
