SPECIAL FEATURES

- Capacity**
 Three epoxy-coated shelves within a 21 cubic foot interior provide organized storage for a range of food service items in a commercial kitchen.
- Tempered Glass Door**
 The single swing door incorporates two layers of tempered glass, allowing staff to view contents without opening the door and reducing unnecessary temperature fluctuation.
- Self-Closing, Stay-Open**
 The self-closing door with a 90-degree stay-open feature supports hands-free loading, a practical detail for busy restaurant and food prep workflows.
- Bottom Mounted Compressor**
 The bottom-mounted compressor positions mechanical components away from the food zone, keeping the full interior height available for shelf placement.
- ETL & ETL**
 The unit carries both ETL Listed and ETL Sanitation Listed certifications, meeting recognized electrical and food safety standards required in commercial kitchen environments.
- Casters with Brakes**
 Four casters with individual brakes allow the refrigerator to be repositioned easily within a kitchen layout and locked in place once the desired location is set.

PRODUCT OVERVIEW

Frigomax Series 27" Reach-In Refrigerator is a single-section, glass-door unit suited for commercial kitchens, restaurants, cafés, and food service operations that require accessible, front-of-house or back-of-house refrigeration in a compact footprint.

The unit holds 21 cubic feet of storage capacity across 3 epoxy-coated shelves, maintaining a temperature range of 33°F to 41°F controlled by an electronic temperature controller. The single swing glass door features two layers of tempered glass, a self-closing mechanism, and a 90-degree stay-open feature for hands-free loading. A right-side hinge and integrated lock with key provide standard access control for food safety management in shared kitchen environments.

Measuring 32 1/16" (L) x 27" (W) x 83 1/4" (H), the refrigerator is freestanding and finished in stainless steel with a silver exterior. The bottom-mounted compressor keeps the interior clear for maximum shelf use, while the EC fan motor supports consistent air circulation. Four casters with brakes allow the unit to be repositioned on the floor and secured once in place.

The unit operates on 115V/60Hz single-phase power, draws 2 amperes, and is powered by a 1/5 horsepower compressor. It connects via a NEMA 5-15P plug and is ETL Listed and ETL Sanitation Listed, confirming compliance with recognized commercial kitchen safety and sanitation standards.
