WARRANTY

1 Year Warranty

SPECIAL FEATURES

- Large Display Run**
 At 101.6 inches wide, this case spans a full service counter, giving a bakery or restaurant more shelf space to present a varied selection of food items at once.
- Low-GWP Refrigerant**
 R-290 refrigerant operates with a significantly lower global warming potential than conventional alternatives, aligning the unit with current environmental standards in commercial kitchens.
- Energy-Efficient Operation**
 Running at 690 watts and 7 amperes on a standard 110-volt, 60-hertz circuit, this unit fits into existing commercial kitchen electrical infrastructure without requiring a dedicated high-amperage line.
- Spacious 34 Cu Ft**
 The 34.0 cubic foot cabinet holds a high volume of refrigerated pastries, sandwiches, and chilled goods, reducing how often staff need to restock during a busy service period.
- Triple Certification Compliance**
 ETL Listed, ETL Sanitation Listed, and DOE 2017 Compliant ratings confirm this case meets recognized safety, food sanitation, and energy efficiency requirements for commercial food handling.
- Covered by 1-Year Warranty**
 Each unit ships with a 1-Year Warranty, providing a defined period of coverage for a commercial kitchen's investment in this display case.

PRODUCT OVERVIEW

The Frigomax Series Dry and Refrigerated Bakery Display Case is a freestanding serve-over counter unit designed for restaurants, cafes, bakeries, and commercial kitchens that need to present refrigerated and dry goods attractively at the point of service.

The straight glass front and tempered glass shelving give staff and customers a clear, unobstructed view of displayed items. At 34.0 cubic feet of interior capacity, this unit accommodates a substantial volume of pastries, sandwiches, chilled desserts, or other food items ready for service. Ventilated cooling circulates air evenly throughout the cabinet and holds temperature between 32 and 41 degrees Fahrenheit, suitable for a wide range of refrigerated bakery and food items.

Built-in LED lighting illuminates the display interior without generating the heat of older lamp types, keeping displayed food at stable temperatures. The unit draws 7 amperes at 110 volts and 690 watts, running on standard commercial kitchen electrical supply at 60 hertz. R-290 refrigerant is used throughout the system, a low global-warming-potential (GWP) option increasingly preferred in commercial food service environments.

The cabinet measures 101.6 inches wide by 37.0 inches deep by 47.2 inches tall, offering a generous front display run for high-traffic service counters. ETL Listed, ETL Sanitation Listed, and DOE 2017 Compliant certifications confirm the unit meets established safety, sanitation, and energy standards for commercial food handling. A 1-Year Warranty is included with each unit.
