Warranty

**SPECIAL FEATURES**

- ✓ **High Output Performance**  
Six burners deliver a total of 168,000 BTU for fast cooking.

✓ **Durable Stainless Steel Body**  
Built for long-lasting commercial kitchen use.

✓ **Removable Drip Tray**  
Simplifies cleaning by collecting grease and spills.
- ✓ **Lift-Off Burner Design**  
Allows quick cleaning and easy maintenance.

✓ **Flexible Gas Compatibility**  
Works with natural gas and propane with included conversion kit.

✓ **1-Year Warranty**  
Includes parts and labor warranty for reliable use.

## PRODUCT OVERVIEW

The gas hot plate from the KitchenCore Series is engineered for high-capacity cooking in commercial kitchens. Manufactured in China, this countertop unit features six powerful burners, making it ideal for restaurants, hotels, and catering setups that require efficient multi-burner cooking in a compact space. Its design allows seamless integration into professional kitchen workflows.

Constructed with a durable stainless steel body, the hot plate ensures long-lasting performance and resistance to heavy-duty use. The lift-off burner design allows easy cleaning and maintenance, while cast iron burners provide even heat distribution for consistent cooking results. Adjustable stainless steel legs enhance stability and allow proper positioning on different surfaces.

Each burner delivers 28,000 BTU, providing a total output of 168,000 BTU for high-efficiency cooking. The manual control system offers precise flame adjustment, and the standby pilot ignition ensures reliable startup. The unit supports both natural gas and propane operation and includes an LP conversion kit for flexible installation.

For easy maintenance, the hot plate includes a full-length removable drip tray that collects grease and spills. Certified by NSF International and compliant with CSA and ETL standards, it meets commercial safety requirements. Backed by a 1-year parts and labor warranty, this hot plate is a dependable choice for professional kitchens.
