SPECIAL FEATURES

- Clear Curved View**
 The curved glass front and door style give restaurant and bakery customers an unobstructed sightline to every displayed item, supporting self-selection at the counter.
- Wide Service Counter**
 At 101.6 inches wide, this serve-over counter accommodates a large assortment of baked goods across a single continuous display run.
- Safe Chill Range**
 A holding temperature of 32°F to 41°F keeps cream-based pastries, sandwiches, and other perishable bakery items within food-safe refrigeration thresholds during service hours.
- Energy-Efficient Refrigerant**
 R-290 refrigerant delivers effective cooling with a low GWP rating, supporting compliance with current environmental guidelines for commercial kitchen equipment.
- Certified for Commercial Use**
 ETL Listed, ETL Sanitation Listed, and DOE 2017 Compliant certifications confirm this unit meets recognized safety, sanitation, and energy efficiency standards for food service environments.
- Standard Circuit Compatible**
 At 110V/60Hz and 8.11 amperes, this display case connects to a standard commercial outlet without requiring dedicated high-voltage electrical work.

PRODUCT OVERVIEW

The Frigomax Series refrigerated bakery display case is a serve-over counter unit designed for bakeries, cafes, patisseries, and commercial kitchens that need to merchandise chilled and dry baked goods at the point of sale. The curved glass front gives customers a clear, unobstructed view of displayed items while maintaining a professional presentation on the sales floor.

This freestanding unit measures 101.6" (L) x 33.5" (W) x 48.4" (H), offering 31.1 cubic feet of interior storage across glass shelves. The temperature range of 32°F to 41°F keeps perishable bakery items such as cream-filled pastries, mousse cakes, and sandwiches within safe holding temperatures throughout service. Interior LED lighting illuminates displayed products evenly without generating excess heat inside the cabinet.

The display case runs on 110V/60Hz and draws 8.11 amperes, making it compatible with standard commercial kitchen electrical circuits without requiring a dedicated high-amperage outlet. The R-290 refrigerant is a low global warming potential (GWP) option that aligns with current environmental compliance standards. The stainless steel exterior construction holds up to the daily demands of a busy food service environment and is straightforward to wipe down between service periods.

This unit carries ETL Listed and ETL Sanitation Listed certifications, confirming it meets recognized safety and food handling standards for commercial use. DOE 2017 Compliant certification reflects that it meets federal energy efficiency requirements. A 1-year warranty is included with each unit.
