APPARTAMENTO TCA

Temperature-optimized home espresso: the evolution of Rocket Appartamento.

The Appartamento TCA elevates Rocket's iconic domestic machine with a unique hybrid PID-driven temperature-control system, enabling boiler pressure settings from 0.9 to 1.2 bar across four presets.

Alongside a 1.8 L copper heat-exchange boiler and redesigned E61 brew group, it delivers significantly improved thermal stability and extraction consistency compared to the original model.

Designed to suit any style, it comes in five striking color combinations, blending classic stainless steel or matte black with contrasting side panel inserts in white, black, or copper.

SPECIFICATIONS	
PID PRESSURE CONTROL	YES
TOTAL BOILER CAPACITY	1.8 L
WATER TANK CAPACITY	2.5 L
WATTAGE	220-240V; 50/60 Hz; 1350W
DIMENSIONS	270W × 448D × 358H* mm * Including cup frame
WEIGHT	22 Kg
WATER TANK LEVEL SENSOR	YES

FEATURES

- Design by V12
- Temperature Control Adjustment
- Custom color side circles*

  * Available in six colors and two wood color option
