Includes bowl guard, emergency stop, and safety cut-switch.
- ✓ **Powerful Motor Performance**
1.5 HP motor ensures efficient and consistent mixing results.
- ✓ **Durable Floor Model Design**
Stable and sturdy construction for heavy daily use.
- ✓ **1-Year Warranty**
Comes with parts and labor coverage for reliability.

PRODUCT OVERVIEW

The KitchenCore Series planetary mixer is built for reliable and efficient mixing in medium-duty commercial kitchens. Manufactured in China, this floor/stand model is ideal for bakeries, restaurants, cafés, and foodservice operations that require higher capacity and performance. Its robust construction and ergonomic design make it suitable for continuous daily use.

Constructed with a durable metal body and a stainless steel mixing bowl, this mixer ensures long-lasting durability and easy maintenance. Powered by a 1.5 HP motor with a gear-driven transmission, it delivers consistent torque and reliable mixing performance. With a large 20 qt bowl capacity and 17.6 lb dough capacity, it is perfect for preparing dough, batters, creams, and more in larger quantities.

The mixer features three manual speeds, allowing flexibility for different mixing applications. The push-button control system ensures simple operation, while the lever-style lift mechanism allows smooth bowl positioning. Designed for 110V single-phase power, it integrates easily into most commercial and residential kitchen setups.

Safety and convenience are key highlights, with features such as an emergency stop, bowl guard, safety cut-switch, and surge protector. It includes essential 304 stainless steel attachments like a flat beater, dough hook, wire whisk, and wire guard. Certified with ETL sanitation standards and backed by a 1-year parts and labor warranty, this mixer delivers dependable and efficient performance.
