WARRANTY
1 Year Limited

SPECIAL FEATURES

- ✔ **Corrosion Resistant Body**
Aluminum alloy construction supports use in wet commercial kitchen environments.
- ✔ **Efficient Flow Rate**
8 GPM flow rate supports food waste processing in commercial kitchen systems.
- ✔ **Certified Standards**
UL, CSA, and CE certifications align with safety requirements in restaurant environments.
- ✔ **Watertight Controls**
Includes NEMA 4 watertight controls for operation in moisture-exposed areas.
- ✔ **Quiet Operation**
Designed for reduced noise during food waste disposal tasks.
- ✔ **Warranty Coverage**
Includes a 1-year warranty by the manufacturer for commercial kitchen use.

PRODUCT OVERVIEW

The ChefPro Series food waste disposer is designed for restaurants, dishwashing stations, and commercial kitchen environments requiring continuous food waste processing. It is constructed from aluminum alloy with a heat treated aluminum alloy body, supporting durability in food handling and waste disposal areas. The corrosion-resistant body supports use in wet commercial kitchen conditions.

This unit features a 3.5-inch opening size, supporting integration with sink assembly disposer setups. It operates with a flow rate of 8 GPM, aligning with water flow requirements in commercial kitchen waste systems. The disposer includes a water saver control and NEMA 4 watertight controls, supporting operation in environments exposed to moisture.

The system is designed with an extended lip water seal and a tapered roller bearing, supporting internal operation during waste processing. A water-cooled motor is included, supporting temperature management during use. The unit is built for quiet operation, aligning with controlled noise levels in commercial kitchen environments.

This disposer is compatible with 2-inch or 3-inch drain outlet sizes, supporting standard plumbing connections in restaurant setups. It is UL, CSA, and CE certified, aligning with safety and compliance standards. It includes a 1-year warranty by the manufacturer.
