WARRANTY

**10-Year Panel, 1-Year
Parts on Doors, 1-Year
Compressor & Parts on
Remote Refrigeration
Unit**

SPECIAL FEATURES

- Galvanized Steel Build**
 White galvanized steel construction supports commercial kitchen refrigeration environments with daily operation.
- Polyurethane Insulation**
 4-inch polyurethane insulation with R-28 thermal resistance supports temperature retention inside the cooler.
- Integrated Cooling Components**
 The unit includes both a condensing unit and evaporator for refrigeration installation.
- Secure Door Design**
 Solid swing door with keyed lock supports restricted access in commercial food storage areas.
- Commercial Certifications**
 UL Listed US, NSF Listed, and DOE certifications align with commercial kitchen requirements.
- Organized Storage Space**
 Nominal dimensions of 10 ft x 15 ft provide refrigerated storage for restaurant food handling applications.
- Remote Refrigeration Setup**
 Remote refrigeration configuration separates cooling components from the main storage section.
- Valve Configuration**
 Thermostatic expansion and liquid line solenoid valves are included in the refrigeration system design.
- Self-Closing Operation**
 Flush-mounted self-closing door design supports repeated access during restaurant workflow.
- Warranty Coverage**
 Includes a 10-year panel warranty and 1-year coverage on doors, compressor, and refrigeration parts.

PRODUCT OVERVIEW

The PolarBox Series Walk-In Cooler is designed for commercial kitchen operations, restaurants, and refrigerated food storage applications. It features white galvanized steel construction for foodservice environments with routine daily use. The unit measures 118" (L) x 177" (W) x 87" (H), with a nominal size of 10 ft width, 15 ft depth, and 7 ft height for organized cold storage.

This walk-in cooler includes 4-inch thick polyurethane insulation with an R-28 thermal resistance rating to support refrigerated holding conditions. The insulation material is CFC and HFC free and paired with 24-gauge panel construction. The modular cam-lock and tongue-and-groove design supports panel connection and structural assembly.

The unit operates with a remote refrigeration system and includes a condensing unit and evaporator. The refrigeration setup uses a thermostatic expansion valve and liquid line solenoid valve (TXV/TEV). It operates on 208/230 V, 60 Hz, single-phase electrical service with a hardwired connection for commercial refrigeration installations.

This model includes a solid swing door with a 77-inch height, flush-mounted construction, and self-closing operation. A keyed door lock supports controlled access in restaurant food handling areas. The cooler is designed without a floor and is suitable for indoor and outdoor usage. It includes UL Listed US, NSF Listed, and DOE certifications along with a 10-year panel warranty and 1-year coverage on doors, compressor, and refrigeration parts.
