SPECIAL FEATURES

- Compact Floor Footprint**
 At 23 3/8" wide and 26 1/8" deep, this freestanding unit fits into space-limited commercial kitchen or retail floor areas without sacrificing a 10.4 cu ft storage capacity.
- Easy Shelf Configuration**
 Four adjustable heavy-duty epoxy coated shelves allow staff to reconfigure storage levels to fit tall bottles, food pans, or mixed product sizes as menu or display needs change.
- Dual ETL Certifications**
 ETL Listed and ETL Sanitation Listed certifications confirm the unit meets recognized safety and sanitation standards relevant to commercial kitchen and food retail environments.
- Safe Food Temperature Range**
 Electronic temperature control maintains the interior between 33°F and 41°F, keeping refrigerated food items within recognized safe holding temperatures for commercial food service.
- Standard Electrical Connection**
 The 115V/60Hz single-phase supply with a NEMA 5-15P plug means the unit connects to a standard wall outlet, avoiding costly electrical installation work in most commercial kitchens.
- Covered by 1-Year Warranty**
 A 1-year warranty is included with each unit, providing a defined period of coverage from the date of purchase for commercial kitchen operators.

PRODUCT OVERVIEW

The Frigomax Series single-section upright glass door merchandiser refrigerator is designed for commercial kitchens, restaurants, convenience stores, and food service operations that need reliable front-of-house or back-of-house chilled product display in a compact footprint.

At 26 1/8" (D) x 23 3/8" (W) x 74 1/8" (H), this freestanding unit fits into tighter floor spaces while delivering 10.4 cubic feet of interior storage across four adjustable heavy-duty epoxy coated shelves. The right-hinged swing glass door lets staff and customers view contents without opening the cabinet, reducing temperature loss during busy service periods.

Temperature is held between 33°F and 41°F through an electronic temperature control system, keeping perishables within safe food handling ranges. The unit runs on 115V/60Hz single-phase power, draws 1.5 amperes, and uses a standard NEMA 5-15P plug, so no dedicated electrical circuit is required. The R-290 refrigerant and 1/6 HP compressor keep the system running efficiently within commercial kitchen environments.

The exterior is constructed from coated steel with an aluminum alloy frame rail, and the interior shelving is epoxy coated for easy cleaning and resistance to corrosion. Interior LED lighting illuminates stored items clearly. A keyed lock — with locks and keys included — secures the glass door, adding an access control layer suitable for staffed commercial kitchen and retail settings. The unit carries ETL Listed and ETL Sanitation Listed certifications and is backed by a 1-year warranty.
