1 Year Limited Warranty

SPECIAL FEATURES

- Fast Wash Cycles**
 A 2-minute cycle supports quick glass turnover during busy service periods.
- Efficient Water Usage**
 Uses only 1/2 gallon of water per cycle, supporting reduced utility consumption.
- Compact, Freestanding Design**
 Fits easily into bar or café layouts without requiring built-in installation.
- High-Temperature Performance**
 High-temp operation with thermocontrol supports consistent cleaning results.
- Complete Rack Package Included**
 Ships with glass racks, a high-temperature rack, saucer insert, and cutlery containers.
- Quiet Operation**
 45 dB noise level supports front-of-house or bar-area use.

PRODUCT OVERVIEW

The PrepMaster Series PMGW18 stainless steel high-temp glasswasher is designed for fast, efficient glassware cleaning in commercial bar and beverage service environments. Built with a durable stainless steel exterior, it supports consistent performance while maintaining a compact footprint suitable for undercounter or front-of-house installations.

This high-temperature glasswasher operates on a 2-minute wash cycle and processes up to 30 racks per hour, supporting steady service during peak hours. With a 16" x 16" rack size and a 12-gallon capacity, it accommodates a wide range of glassware commonly used in bars, cafés, and restaurants.

The PMGW18 uses just 1/2 gallon of water per cycle and features stainless steel rotating wash arms on both the top and bottom for thorough coverage. Integrated wash and rinse thermometers, along with thermocontrol temperature management, support consistent wash results throughout continuous operation.

A built-in rinse aid dispenser, gravity drain system, and digital controls contribute to streamlined operation. Operating at a low 45 dB noise level, this unit supports quieter service areas. Safety is supported by a door opening safety device that stops operation when the door is opened.
