10 qt bowl with 7 lb dough capacity handles various recipes.
- ✓ **Compact Countertop Design**  
Saves space while delivering commercial-grade performance.
- ✓ **1-Year Warranty**  
Comes with parts and labor warranty for peace of mind.

## PRODUCT OVERVIEW

The KitchenCore Series planetary mixer is a reliable and efficient solution for medium-duty mixing in commercial and home kitchens. Manufactured in China, this compact countertop unit is ideal for bakeries, restaurants, cafés, and even home use. Its sturdy build and user-friendly design make it perfect for handling everyday mixing tasks with ease.

Constructed with durable metal housing and equipped with a stainless steel mixing bowl, this mixer ensures long-lasting performance and easy cleaning. The gear-driven transmission system delivers consistent power, while the 1 HP motor provides efficient mixing for a variety of recipes. With a 10 qt bowl capacity and 7 lb dough capacity, it is suitable for preparing batters, doughs, and creams.

The mixer features three manual speeds, allowing flexibility for different mixing requirements. Its push-button control system ensures simple operation, while the lever-style lift mechanism provides easy bowl adjustment. Designed for 110V single-phase power, it integrates smoothly into most kitchen setups without requiring special electrical configurations.

Safety and convenience are key highlights, with features like an emergency stop, bowl guard, safety cut-switch, and surge protector. It includes essential attachments such as a flat beater, dough hook, wire whisk, and wire guard, all made from 304 stainless steel. Certified with ETL sanitation standards and backed by a 1-year parts and labor warranty, this mixer offers dependable performance for daily use.
