Warranty**

SPECIAL FEATURES

- ✓ **Maximum Cooking Power**

Eight burners deliver a total of 224,000 BTU for heavy-duty use.
- ✓ **Durable Stainless Steel Body**

Built to handle demanding commercial kitchen environments.
- ✓ **Removable Drip Tray**

Helps maintain cleanliness with easy grease collection.
- ✓ **Lift-Off Burner Design**

Ensures easy cleaning and hassle-free maintenance.
- ✓ **Flexible Gas Compatibility**

Works with natural gas and propane with included conversion kit.
- ✓ **1-Year Warranty**

Includes parts and labor warranty for peace of mind.

PRODUCT OVERVIEW

The gas hot plate from the KitchenCore Series is built for maximum cooking capacity in high-demand commercial kitchens. Manufactured in China, this countertop unit features eight powerful burners, making it ideal for restaurants, hotels, and catering operations that require large-scale, multi-burner cooking with consistent performance.

Constructed with a heavy-duty stainless steel body, the hot plate ensures durability and resistance to daily wear. The lift-off burner design allows easy cleaning and maintenance, while cast iron burners provide even heat distribution across the cooking surface. Adjustable stainless steel legs offer stability and proper height alignment on various kitchen setups.

Each burner delivers 28,000 BTU, providing a total output of 224,000 BTU for high-efficiency cooking. The manual control system allows precise flame adjustment, while the standby pilot ignition ensures reliable and quick startup. The unit supports both natural gas and propane and includes an LP conversion kit for flexible installation.

Designed for convenience, the hot plate includes a full-length removable drip tray that collects grease and spills for easy cleaning. Certified by NSF International and compliant with CSA and ETL standards, it meets commercial safety requirements. Backed by a 1-year parts and labor warranty, this unit is a reliable solution for professional kitchens.
