WARRANTY

1 Year Limited Warranty

SPECIAL FEATURES

- ✓ **Daily Output**
Produces 130 lb of ice in 24 hours for beverage service and routine commercial kitchen demand.
- ✓ **Air Cooling**
Air-cooled condenser supports heat exchange during continuous ice production cycles.
- ✓ **Sanitation Certified**
NSF Certified rating aligns with hygiene and sanitation standards for commercial kitchens.
- ✓ **Built-In Storage**
Integrated bin holds 130 lb of ice to keep supply available during restaurant operations.
- ✓ **Push Dispense**
Push button dispenser style allows direct ice release for controlled food handling.
- ✓ **Warranty Coverage**
Includes a 1-year limited warranty by the manufacturer for specified parts and service.

PRODUCT OVERVIEW

The Platinum Frost Series ice maker is designed for restaurants, cafés, and commercial kitchen beverage stations that require on-site ice production and storage in one unit. The stainless steel exterior in a silver finish supports routine cleaning and daily food handling conditions. A stainless steel evaporator forms the ice surface, supporting consistent operation. This freestanding design fits along prep counters or service areas for accessible placement.

This unit produces up to 130 lb of ice within 24 hours to match moderate drink and service needs in cafés, bars, and small restaurants. The integrated bin storage capacity also holds 130 lb, allowing produced ice to remain stored inside the cabinet. The air-cooled condenser supports heat exchange during operation, and the system runs on 115 V power with a 60 Hz electrical rating suitable for standard commercial connections.

The dispenser uses a push button style, allowing staff to release ice directly into cups or containers during beverage preparation. This configuration supports portion control and organized food handling during peak service times. The cabinet measures 22" (L) x 30.6" (W) x 53.5" (H), providing a tall profile with combined production and storage. The freestanding installation type supports flexible placement within back-of-house layouts.

This series carries NSF Certified status to align with sanitation standards used in commercial kitchens. The stainless steel body and internal components support regular cleaning schedules and daily use. Classified as an ice maker with integrated storage, it serves beverage counters and prep zones. It includes a 1-year limited warranty by the manufacturer for specified coverage on parts and workmanship.
