1 Year Warranty

SPECIAL FEATURES

- ✔ **Wide Display Counter**

At 101.6 inches wide, the case accommodates a broad assortment of bakery items across a continuous display surface, reducing the need for multiple smaller units.
- ✔ **Eco-Friendly Refrigerant**

R290 refrigerant used in this system has a significantly lower global warming potential than conventional refrigerants, aligning with sustainability expectations in modern food service operations.
- ✔ **Simple Plug-In Setup**

The plug-in installation design runs on a standard 110V / 60Hz supply, so the unit is ready to operate without dedicated electrical circuits or specialist installation.
- ✔ **Clear Front Glass Access**

The openable front glass panel allows staff to serve customers efficiently while keeping displayed items fully visible and accessible throughout service.
- ✔ **Even LED Illumination**

Built-in LED lighting brightens the interior display area consistently, helping baked goods and confections stand out to customers without adding unwanted heat to the cabinet.
- ✔ **Practical Counter Height**

Standing 48.6 inches tall and 45.8 inches deep, the case fits at standard serve-over counter height, keeping displayed items at an easy-to-view and easy-to-reach level for staff and customers.

PRODUCT OVERVIEW

The Frigomax is a dry and refrigerated bakery display case designed for commercial kitchens, patisseries, cafés, and restaurant front-of-house counters where both visual presentation and temperature-controlled storage matter.

Built as a gravity coil service case, this unit uses a gravity coil cooling system paired with R290 refrigerant a low-global-warming-potential choice increasingly specified in food service environments. The serve-over counter configuration allows staff to access product from behind the unit while customers view merchandise through the front-facing glass.

The front glass panel is openable, giving customers or service staff clear, unobstructed sightlines to displayed items while maintaining a practical service workflow. Integrated LED lighting illuminates the interior evenly, highlighting baked goods, pastries, and confections without generating excessive heat near temperature-sensitive items.

At 101.6 inches wide, 45.8 inches deep, and 48.6 inches tall, this display case provides a generous counter footprint suited to high-traffic retail or food service settings. The plug-in installation type means the unit operates on a standard 110V / 60Hz supply without requiring dedicated electrical work, simplifying placement within an existing commercial kitchen or front counter layout.
