Vertical Masticating Juicer

Model **VSJ843QS** Vertical Masticating Juicer

New Vertical Juicers from Omega operate at a super low speed of 43 RPM. Omega's powerful 250 watt motor and reduction gears combine to produce twice the crushing force of most low speed vertical juicers. The power of the dual edge auger, the tighter fit tolerance and the low speed operating system cuts and squeezes ingredients rapidly to yield the maximum amount of juice. This process also breaks down fiber to a palatable level for less pulp and a smoother, nutrient-rich juice.
