1 Year Warranty

SPECIAL FEATURES

- Clear Product Visibility**
 The swing glass door lets customers and staff view refrigerated contents at a glance, reducing door-open time on a busy service floor.
- Steady Safe-Zone Cooling**
 Electronic temperature control holds the cabinet between 33°F and 41°F, keeping refrigerated food and beverages within the standard commercial kitchen safe-hold range.
- Certified for Commercial Use**
 ETL Listed and ETL Sanitation Listed certifications confirm this merchandiser meets established safety and sanitation requirements for food service and commercial kitchen installations.
- Flexible Shelf Layout**
 Four adjustable heavy-duty epoxy coated shelves allow staff to reconfigure interior space to fit beverages, prepped foods, or grab-and-go items of different heights.
- Low-Maintenance Defrost**
 Automatic defrost handles ice buildup without manual intervention, reducing downtime and staff workload during high-traffic restaurant service.
- Covered After Purchase**
 A 1-year warranty provides documented coverage, giving food service operators a defined service period following installation.

PRODUCT OVERVIEW

The Frigomax Series single-door commercial merchandiser refrigerator is designed for restaurants, cafes, convenience stores, and other food service operations that need front-facing cold beverage or food display in a compact footprint.

Measuring 24 5/8" (L) x 23 3/8" (W) x 76 5/8" (H), this freestanding unit fits into tight floor spaces while delivering 12.3 cubic feet of interior storage capacity. Four adjustable heavy-duty epoxy coated shelves allow staff to configure interior layout to accommodate varying product heights and restocking needs.

The swing glass door with right-side hinge gives customers and staff clear visibility of contents without opening the unit, while the electronic temperature control maintains a steady range of 33°F to 41°F — the standard safe zone for refrigerated food and beverage holding in a commercial kitchen. Automatic defrost reduces manual maintenance demands during busy service periods, and integrated LED lighting keeps displayed items visible without adding significant heat load.

The unit operates on 115V single-phase power at 60 Hz, draws 2.4 amperes, and is fitted with a NEMA 5-15P plug for straightforward connection to a standard commercial outlet. The 1/5 horsepower compressor keeps energy draw modest for an always-on display unit. ETL Listed and ETL Sanitation Listed certifications confirm the unit meets recognized safety and sanitation standards for commercial kitchen and food retail environments. This unit is backed by a 1-year warranty.
