2 HP motor ensures consistent and efficient heavy-duty mixing.
- ✓ **Durable Floor Model Design**
Built for stability and long-lasting commercial use.
- ✓ **1-Year Warranty**
Comes with parts and labor coverage for peace of mind.

PRODUCT OVERVIEW

The KitchenCore Series planetary mixer is engineered for powerful and efficient mixing in medium-duty commercial environments. Manufactured in China, this floor model is ideal for bakeries, restaurants, cafés, and high-demand kitchens that require larger batch preparation. Its sturdy construction and professional-grade design make it perfect for continuous daily use.

Built with a durable metal body and a stainless steel mixing bowl, this mixer ensures long-lasting performance and easy cleaning. The gear-driven transmission system combined with a powerful 2 HP motor delivers consistent torque for heavy mixing tasks. With a large 30 qt bowl capacity and 24.9 lb dough capacity, it is well-suited for preparing dough, batters, creams, and more in bulk quantities.

The mixer features three manual speeds, offering flexibility for various mixing applications. Its push-button control system allows simple and efficient operation, while the lever-style lift mechanism ensures smooth and convenient bowl positioning. Designed for 110V single-phase power, it integrates easily into most commercial kitchen setups.

Safety is a key priority, with built-in features such as an emergency stop, bowl guard, safety cut-switch, and surge protector. It comes with essential 304 stainless steel attachments including a flat beater, dough hook, wire whisk, and wire guard. Certified with ETL sanitation standards and backed by a 1-year parts and labor warranty, this mixer delivers reliable performance and durability.
