1 Year Warranty

SPECIAL FEATURES

- Stainless Steel Build**
 Both the exterior and interior are constructed from stainless steel, providing a durable, cleanable surface appropriate for commercial kitchen environments.
- EC Fan Motor**
 The EC fan motor stops operating when the door is open, reducing unnecessary energy draw and helping maintain consistent interior temperatures during access.
- ETL Certified**
 This unit is both ETL Listed and ETL Sanitation Listed, confirming it meets recognized safety and food-service sanitation standards for commercial kitchen installations.
- Electronic Temperature Control**
 An electronic control system maintains the interior temperature within a 33–41°F range, supporting safe food handling and storage in restaurant applications.
- Self-Closing Door Design**
 The right-hinged solid door is self-closing with a 90-degree stay-open feature, allowing chefs and kitchen staff to load items without holding the door manually.
- Mobility with Brakes**
 Heavy-duty casters with brakes allow the refrigerator to be moved for cleaning or repositioning and locked firmly in place during active kitchen service.

PRODUCT OVERVIEW

The Frigomax Series 29" Undercounter Refrigerator is a compact, single-door cold storage unit suited for commercial kitchens, restaurant prep stations, and bar service areas where space beneath counters is used efficiently.

Built from stainless steel on both exterior and interior surfaces, this undercounter refrigerator measures 30" (L) x 29" (W) x 35-9/16" (H) and holds 7.3 cubic feet of refrigerated storage. The unit operates on 115V/60Hz single-phase power, drawing 1.7 amperes, and is driven by a 1/5 horsepower motor. It connects via a standard NEMA 5-15P plug, making integration into existing commercial kitchen electrical setups straightforward.

Temperature is maintained within a 33–41°F range and managed through an electronic control system. The solid door is hinged on the right and features a self-closing mechanism with a 90-degree stay-open function, supporting hands-free loading during busy service. When the door is open, the evaporation fan stops automatically — a design detail that reduces energy use and maintains interior temperature stability. The EC fan motor contributes to consistent airflow and operational efficiency.

Inside, one adjustable epoxy-coated shelf adapts storage to different container sizes. The unit ships with locks and keys for access security and rides on heavy-duty casters with brakes for repositioning and secure service placement. The Frigomax Series Undercounter Refrigerator is ETL Listed and ETL Sanitation Listed, meeting applicable safety and sanitation standards. A 1-year warranty is included.
