WARRANTY

Parts & Labor: 2 Years

Compressor: 6 Year

SPECIAL FEATURES

- ✓ High Capacity**
 Produces 700 lb of cube ice in 24 hours for continuous restaurant and commercial kitchen demand.
- ✓ Digital Monitoring**
 LED digital display with digital control, self check, and status indication for clear operational feedback.
- ✓ Certified Compliance**
 Energy Star, ETL Sanitation, cETLus Listed, and NSF Listed certifications match commercial safety and sanitation standards.
- ✓ Fast Cycles**
 Completes each production batch in 15–17 minutes to support steady beverage and food handling service.
- ✓ Easy Maintenance**
 Removable front dust filter and auto clean function support regular cleaning in busy kitchen environments.
- ✓ Warranty Coverage**
 Includes a 2-year warranty on parts and labor and a 6-year compressor warranty by the manufacturer.

PRODUCT OVERVIEW

The Platinum Frost Series air cooled ice machine without bin is built for restaurants, cafés, and commercial kitchen beverage stations that require high-volume cube ice production. The stainless steel exterior supports daily food handling use, while the polyethylene interior provides a smooth, food-contact surface. The unit operates on 220 V, single phase power with a NEMA 6-20P plug and 60 Hz electrical rating for standard commercial installation and consistent electrical compatibility.

This series produces up to 700 lb of cube ice within 24 hours to match continuous drink service and prep needs. Each batch forms ice in approximately 15 to 17 minutes, providing regular production intervals during peak periods. The air-cooled condenser uses a ventilated air flow layout and R-290 refrigerant for heat exchange. Cabinet dimensions measure 30" (L) x 23.4" (W) x 22.3" (H), fitting under counters or back-of-house areas.

Operation uses a digital control system paired with an LED digital display for clear monitoring of functions. Built-in diagnostic sensors support self check and status indication. The function set includes auto clean, thickness adjustable ice settings, and a count down timer for production tracking. Adjustable ice thickness allows cube formation to match beverage service or food handling requirements commonly found in restaurant and café workflows.

A removable front dust filter provides direct access for routine maintenance and cleaning. The unit holds ice up to 24 hours during power failure to retain stored supply. Rated at 1500 W, the machine supports higher output demands. Energy Star, ETL Sanitation, cETLus Listed, and NSF Listed certifications align with commercial kitchen standards. It includes a 2-year warranty on parts and labor and a 6-year compressor warranty by the manufacturer.
