**WARRANTY**

**1 Year Warranty**

### SPECIAL FEATURES

- Organized Display Space**  
 The 16.3 cu ft cabinet with adjustable shelves behind the glass door allows kitchen and front-of-house staff to organize and reconfigure chilled display items without tools or downtime.
- Frost-Free Operation**  
 The frost-free defrost system removes the need for scheduled manual defrost cycles, reducing maintenance interruptions during busy restaurant service hours.
- Certified for Commercial Use**  
 ETL Listed, ETL Sanitation Listed, and DOE 2017 certifications confirm the unit meets electrical safety, sanitation, and energy efficiency standards required in commercial food service environments.
- Consistent Chill Zone**  
 A temperature range of 36°F to 46°F keeps beverages and prepared foods within safe holding temperatures across a full-day service without manual adjustment.
- Compact Power Draw**  
 Operating at 110V, 4 amps, and 430 watts, this chiller connects to a standard commercial kitchen circuit without requiring dedicated high-amperage electrical work.
- Bright Interior Visibility**  
 Built-in LED lighting illuminates the full cabinet interior so customers and staff at the counter can clearly see all displayed items without opening the door.

# PRODUCT OVERVIEW

The Frigomax Series 24.8" Vertical Display Chiller is a single-section, glass-door merchandiser refrigerator designed for restaurants, cafés, convenience counters, and other commercial kitchen environments where front-of-house beverage and food display is essential.

With a 16.3 cubic foot interior and a temperature range of 36°F to 46°F, this unit holds chilled beverages, grab-and-go items, and prepared foods at safe serving temperatures throughout a busy service period. The single swing glass door with a full-length handle and right-side hinge is fitted with a self-closing mechanism, helping maintain consistent cabinet temperature during high-traffic use. Adjustable shelves allow operators to configure interior space around varying product heights.

The bottom-mounted compressor running on 110V at 4 amps and 430 watts keeps the electrical footprint modest for counter or floor placement. R290 refrigerant is used in the sealed system, and frost-free defrost eliminates manual defrost cycles. The unit is rated for ambient environments up to 90°F, suitable for warmer front-of-house areas. The aluminum frame rail and stainless steel exterior in black finish suit both modern and traditional commercial kitchen décor.

At 28.7" (D) x 24.8" (W) x 79.1" (H), the Frigomax Vertical Display Chiller fits a standard single-door footprint while maximizing vertical display capacity. LED lighting illuminates the full interior cabinet, keeping displayed items clearly visible to customers. The unit carries ETL Listed, ETL Sanitation Listed, and DOE 2017 certifications, confirming it meets recognized commercial food safety and energy standards.
