1 Year Warranty

SPECIAL FEATURES

- ✓ Clear Product Visibility**
 The swing glass door lets staff and customers view contents at a glance without opening the unit, reducing unnecessary cold-air loss during a busy service.
- ✓ Consistent Safe Temperatures**
 Electronic temperature control maintains the cabinet between 33°F and 41°F, keeping refrigerated food within the standard safe-handling range required in commercial kitchens.
- ✓ Dual Safety Certifications**
 ETL Listed and ETL Sanitation Listed certifications confirm the unit meets recognized electrical and food-safety standards relevant to commercial kitchen and food service environments.
- ✓ Flexible Shelf Layout**
 Four adjustable heavy-duty epoxy-coated shelves across the 12.6 cu ft interior adapt to different item sizes, helping a restaurant or deli maximize usable space between restocks.
- ✓ Simple Electrical Setup**
 Operating at 115V, 2.4A on a standard NEMA 5-15P plug means the unit connects to a common wall outlet — no dedicated circuit or electrician required for most installations.
- ✓ Covered Under Warranty**
 The included 1-year warranty provides documented coverage, giving purchasing managers and operators a clear support window after installation.

PRODUCT OVERVIEW

The Frigomax Series VSC398VTW is a single-section commercial merchandiser refrigerator designed for restaurants, delis, convenience stores, and food service operations that need reliable front-of-house or back-of-house cold storage with customer-facing visibility.

Standing 77 5/8" tall with a 23 3/8" width and 24 5/8" depth, this freestanding unit fits compact floor spaces while delivering 12.6 cubic feet of interior capacity. Four adjustable heavy-duty epoxy-coated shelves organize product across the full height of the cabinet, supporting flexible stocking arrangements for beverages, dairy, or prepared foods.

The right-hinged swing glass door allows quick access and clear sightlines into the cabinet without opening it. Electronic temperature control holds the interior between 33°F and 41°F — the standard safe zone for refrigerated food handling in commercial kitchens. Auto defrost keeps the system operating without manual intervention during service hours.

The unit runs on 115V single-phase power, draws 2.4 amperes, and connects via a standard NEMA 5-15P plug, requiring no special electrical work for installation. Interior LED lighting illuminates stored items clearly. The coated steel exterior is durable for daily commercial kitchen use, and the unit carries both ETL Listed and ETL Sanitation Listed certifications. A 1-year warranty is included.
