1 Year Warranty

SPECIAL FEATURES

- Clear Product Visibility**
 The single glass door lets customers and staff view frozen merchandise at a glance without opening the cabinet, reducing cold-air loss during busy service periods.
- Flexible Interior Layout**
 Four adjustable shelves allow the 18 cu ft cabinet to accommodate different package sizes and heights, so the freezer adapts as your inventory mix changes.
- Standard Outlet Ready**
 Drawing 5.7 amperes at 115V/60Hz through a NEMA 5-15P plug, the unit connects to a standard wall outlet with no dedicated electrical circuit required.
- Low-Impact Refrigerant**
 The R-290 refrigerant is widely recognized in commercial kitchen contexts for its low global-warming potential, aligning with increasingly common environmental procurement criteria.
- Certified for Commercial Use**
 ETL Listed and ETL Sanitation Listed certifications confirm the freezer meets established electrical safety and food-safety standards relevant to restaurant and foodservice inspections.
- Covered for One Year**
 The included 1-Year Warranty provides a defined period of manufacturer coverage, giving purchasing managers a clear reference point when budgeting for operational risk.

PRODUCT OVERVIEW

The Frigomax Upright Ventilated Freezer-Glass Door Series is a single-door glass door merchandising freezer designed for restaurants, convenience stores, delis, and other commercial kitchen environments that need accessible frozen product display at the point of sale.

The unit holds 18 cubic feet of frozen inventory within a footprint of 30" (D) x 30½" (W) x 74⅝" (H), making it suitable for floor spaces where a full-width cabinet is not practical. Four adjustable shelves allow operators to reconfigure the interior to fit packaging of varying heights, from bulk bags to individual retail portions. The left-hinged glass door keeps frozen items visible without requiring the door to be opened, supporting customer self-selection in a retail or cafeteria setting.

Temperature is maintained at -8°F to 0°F, covering standard deep-freeze needs for ice cream, frozen proteins, and prepared meals. Electronic controls offer straightforward management, and R-290 refrigerant is a low-impact option common in commercial kitchens. The ½ HP compressor draws 5.7A at 115V/60Hz single-phase, plugging into a standard NEMA 5-15P outlet without requiring dedicated electrical work.

The cabinet is constructed in coated steel and secured with a key lock, providing a basic access control measure in shared or public-facing spaces. Interior and door LED lighting illuminates merchandise clearly for customers and staff. The unit carries ETL Listed and ETL Sanitation Listed certifications, confirming it meets recognized commercial food-safety and electrical safety standards. A 1-Year Warranty is included with each unit.
