SPECIAL FEATURES

- Sliding Doors**
Two sliding glass doors provide visibility of stored beverages and refrigerated items while saving space in commercial kitchen and bar areas.
- Electronic Control**
The electronic control operates within the specified temperature range of 36°F to 50°F for refrigerated storage.
- Certified Design**
ETL Listed and ETL Sanitation Listed certifications are included for commercial kitchen equipment requirements.
- Adjustable Shelving**
Four adjustable epoxy-coated shelves accommodate different bottle, can, and food container sizes used in food handling.
- LED Lighting**
LED interior lighting improves visibility of stored contents during restaurant and bar service.
- Warranty Included**
It includes a 1-year warranty by the manufacturer.

PRODUCT OVERVIEW

The Frigomax Series Back Bar Cooler is a commercial kitchen refrigeration unit designed for restaurants, bars, cafés, hotels, and other food service businesses that require refrigerated beverage and food storage. The cooler features a coated steel exterior in a black finish, providing a durable surface suitable for commercial environments.

It offers a 7.5 cu.ft capacity, providing storage space for beverages and other refrigerated items used in food handling and service. The two sliding glass doors provide a clear view of stored contents while allowing convenient access through the door opening. The key lock provides controlled access when the unit is not in use.

The interior includes four adjustable shelves made from epoxy-coated material, allowing different storage arrangements for bottles, cans, and food containers. LED lighting illuminates the interior, making stored items visible during service.

The cooler operates within a temperature range of 36°F to 50°F, supporting refrigerated storage for beverages and food items in commercial kitchens, restaurants, and bars. It uses an electronic control for temperature adjustment and monitoring.
