PRODUCT OVERVIEW

The Medal Equipment caster is intended for reach-in refrigerators and freezers used in commercial kitchen environments such as restaurants, cafés, and food storage areas. Classified as a caster, it supports equipment mobility for repositioning during cleaning and maintenance. The component functions as a replacement or fitting part for compatible refrigeration units.

This caster is manufactured from polyurethane and zinc-plated steel, combining a durable rolling surface with a reinforced metal frame. The polyurethane wheel material supports smooth movement, while the zinc-plated steel structure provides rigid support. These materials align with common hardware used on refrigerated equipment in commercial kitchens.

The unit is specified as a caster with break, indicating an integrated stopping mechanism for controlled positioning. It features a 2.5 in caster size, defining the wheel diameter for installation and compatibility reference. The stated size aligns with reach-in refrigerator and freezer bases used in food handling operations.

Produced by Medal Equipment, this caster is supplied as a single unit for direct installation or servicing needs. It is listed for use with reach-in refrigerators and freezers in commercial kitchen settings. It includes a 1-year limited warranty by the manufacturer, providing stated coverage for the specified period.
