SPECIAL FEATURES

- ✔ **Turnkey Bubble Tea Business in a Trailer**
Professionally designed, commercial-grade trailer built for real business operations, featuring refrigeration, topping bar, sinks, plumbing, power integration, and an optimized bubble tea workflow.
- ✔ **Built for Health & Safety Compliance**
Comes equipped with a 3-compartment sink, hand sink, stainless prep tables, and food-grade interior fit-out to meet common mobile food code standards (local regulations may vary).
- ✔ **Flexible Power & Plumbing Options**
Supports generator or shore-power plug-in. Integrated fresh water and waste tank system included.
- ✔ **Financing & Business Support**
Financing options available so you can launch sooner with manageable monthly payments.
- ✔ **Perfect for High Sales Volume**
Designed specifically for bubble tea, milk tea, brown sugar boba, cheese tea, specialty drinks, and smoothies. Efficient service layout supports fast-paced operations with minimal staff fatigue.
- ✔ **Strong Commercial Construction**
Heavy-duty chassis, reinforced flooring, insulated walls, and durable metal exterior ensure long-lasting use in professional conditions.
- ✔ **Branding & Business Ready**
Optional exterior full wrap, menu consultancy, POS, additional beverage stations, and layout customization available.

PRODUCT OVERVIEW

The Boba Breeze™ 14 FT Bubble Tea Trailer is a professionally engineered solution for entrepreneurs looking to launch or expand a bubble tea business. It removes the challenges of sourcing builders, managing fabrication issues, compliance concerns, and layout mistakes by providing a complete, ready-to-operate setup.

Designed specifically for modern bubble tea operations, the trailer supports milk tea preparation, boba production, fruit teas, smoothies, and specialty beverages. The layout is planned to support efficient workflow, helping staff prepare and serve drinks smoothly during daily operations.

Built with durable materials and a reinforced structure, this trailer is suitable for real working environments such as malls, festivals, campuses, food courts, tourist locations, and mobile catering operations. It is designed for consistent performance in demanding service conditions.

Includes: Dedicated topping station, undercounter refrigerator, prep chiller, hand sink, 3-compartment sink, fresh water tank, waste water tank, 110V/220V power support, non-slip commercial flooring, and food-grade interior finish.
