WARRANTY
1 Year Warranty

SPECIAL FEATURES

- Two Zones, One Unit**
 The dual temperature design lets a commercial kitchen or food retailer display both chilled and frozen items in a single 10.7 cu ft island case, reducing the need for separate equipment.
- Consistent Fan Cooling**
 Fan-driven refrigeration circulates air evenly throughout the cabinet, supporting stable temperature maintenance across the -0.4 to -8 degree Fahrenheit operating range.
- Low-GWP Refrigerant**
 R-290 refrigerant is a hydrocarbon option with a low global warming potential, aligning with current environmental guidelines for commercial refrigeration equipment.
- Automatic Defrost**
 The built-in automatic defrost system removes ice buildup without requiring staff to manually defrost the unit, reducing downtime on a busy service floor.
- Certified for Commercial Use**
 ETL Listed, ETL Sanitation Listed, and DOE 2017 Compliant certifications confirm this merchandiser meets established electrical safety, sanitation, and energy efficiency standards.
- Covered for One Year**
 A 1-year warranty is included, providing a defined period of coverage for a commercial kitchen or retail operation investing in this island merchandiser.

PRODUCT OVERVIEW

The Frigomax Series dual temperature island air curtain merchandiser is designed for restaurants, grocery stores, convenience shops, and other commercial kitchen or retail food environments that need open-access cold storage for two temperature zones in a single freestanding unit.

This unit operates as both a chiller and a freezer within the same 10.7 cubic foot cabinet, holding temperatures in the -0.4 to -8 degree Fahrenheit range across its dual zones. Fan cooling and automatic defrost work together to maintain consistent temperature distribution without manual intervention from kitchen or floor staff.

The merchandiser measures 59.1" (L) x 37.4" (W) x 36.2" (H) and sits on adjustable leg levelers, making it straightforward to level on uneven commercial kitchen or retail floors. It runs on 110V/60Hz power and draws 21.3 amperes, with a rated wattage of 840/500W depending on operating mode.

R-290 refrigerant, a low-GWP hydrocarbon option, is used in this unit. The Frigomax Series carries ETL Listed, ETL Sanitation Listed, and DOE 2017 Compliant certifications, meeting recognized standards for electrical safety, sanitation, and energy performance in commercial food service settings. A 1-year warranty is included with purchase.
