SPECIAL FEATURES

- Visible Product Display**
 Two sliding glass doors across 51 1/8 inches of width let customers see chilled items at a glance, supporting faster selections on a busy sales floor.
- Generous Cold Storage**
 The 35.3 cu ft interior across two sections accommodates a wide variety of chilled beverages, dairy, or prepared foods between restocks in a high-volume operation.
- Flexible Shelf Layout**
 Eight adjustable heavy-duty epoxy-coated shelves allow staff to reconfigure storage tiers to match different container sizes and display arrangements.
- Low-Draw Power Setup**
 Running on a standard 115V/60Hz single-phase circuit at 6 amperes with a NEMA 5-15P plug, this unit connects to common commercial kitchen electrical outlets without special wiring.
- Certified for Commercial Use**
 ETL Listed and ETL Sanitation Listed certifications confirm the unit meets recognized safety and sanitation requirements for commercial food service environments.
- Included Security Hardware**
 Locks and keys ship with the unit, giving operators immediate control over access to displayed inventory without sourcing additional hardware.

PRODUCT OVERVIEW

The Frigomax Series 2-section commercial merchandiser refrigerator is designed for restaurants, convenience stores, and food service operations that need reliable grab-and-go cold storage in a high-traffic setting. With two sliding glass doors spanning a 51 1/8-inch width, staff and customers alike can view and access chilled items without disrupting the cold zone.

The unit holds 35.3 cubic feet of refrigerated space across two sections, supported by 8 adjustable heavy-duty epoxy-coated shelves that accommodate varying product heights and loading needs. The electronic temperature control maintains a range of 33°F to 41°F, keeping perishables within safe food-handling limits throughout service hours. Automatic defrost reduces manual maintenance demands during busy shifts.

Built with a coated steel exterior, the cabinet measures 29 3/8" (L) x 51 1/8" (W) x 77 5/8" (H) and installs as a freestanding unit, making it straightforward to position on a sales floor or in a commercial kitchen prep area. LED interior lighting keeps displayed items clearly visible, while the NEMA 5-15P plug connects to a standard 115V/60Hz single-phase circuit drawing 6 amperes. The 1/4+ horsepower compressor powers the refrigeration system.

Locks and keys are included, providing controlled access when needed. ETL Listed and ETL Sanitation Listed certifications confirm the unit meets established safety and sanitation standards for commercial food service use. A 1-year warranty is included with purchase.
