1 Year Warranty

SPECIAL FEATURES

- High-Capacity Display**
 The 65.3 cu ft interior accommodates a broad range of perishable items across multiple shelf levels, reducing how often staff need to restock during peak service periods.
- Clear Shelf Visibility**
 LED interior cabinet lighting combined with under-shelf LED strips illuminates every level evenly, making it straightforward for customers or staff to identify items quickly.
- Lower Environmental Impact**
 R290 refrigerant and DOE Compliant status indicate the unit meets current energy and environmental guidelines, which is relevant for operations managing utility costs and compliance requirements.
- Consistent Cold Zone**
 The air curtain system holds temperatures between 30°F and 45°F, keeping refrigerated food and beverages within a safe holding range throughout the day.
- Certified for Food Service**
 ETL Listed and ETL Sanitation Listed certifications confirm the unit meets recognized safety and sanitation standards required in commercial kitchen and retail food environments.
- Stable Freestanding Setup**
 Adjustable leg levelers allow the merchandiser to sit flush and steady on the uneven floors frequently found in commercial kitchens, retail floors, and food service spaces.

PRODUCT OVERVIEW

The Frigomax Series Vertical Air Curtain Merchandiser is a freestanding, European-style open multideck unit designed for commercial kitchens, grocery retailers, convenience stores, and food service operations that require accessible, high-visibility cold storage without a door barrier.

This unit holds 65.3 cubic feet of refrigerated product within a footprint of 31.5" (D) x 76.4" (W) x 78.7" (H), offering substantial display capacity for beverages, dairy, deli items, or prepared foods. The air curtain cooling system maintains a temperature range of 30°F to 45°F, keeping perishables within a safe holding zone throughout service hours.

Interior illumination is provided by LED cabinet lighting and under-shelf LED strips, delivering consistent visibility across all shelf levels without excessive heat output. The unit operates at 220V / 60Hz, draws 16.9 amperes, and runs at 1,830 watts, supporting integration into standard commercial electrical setups. R290 refrigerant is used, a low-global-warming-potential option recognized in DOE Compliant equipment.

Leg levelers allow the unit to be positioned stably on uneven flooring common in commercial kitchen and retail environments. The Frigomax Series carries ETL Listed and ETL Sanitation Listed certifications, and the unit is covered by a 1-year warranty.
